tousek LIFT X

Lifting chain barrier – the useful alternative to barriers

- 12 V technology ■ motor pillar made of powder coated aluminium
- simple installation, already pre-installed ■ any RAL colour available (optional) ■ automatic stop system

Counter pillar

The LIFT X is installed easily and fast. Just fasten the end of the chain to a clamp on your house wall. If there is no such possibility then the use of a counter pillar is optionally available.

Key ring

The key ring which is mounted at the end of the chain serves as predetermined breaking point in case of exterior pressure (e.g. hit by car). The mechanical parts of the LIFT X are therefore preserved.

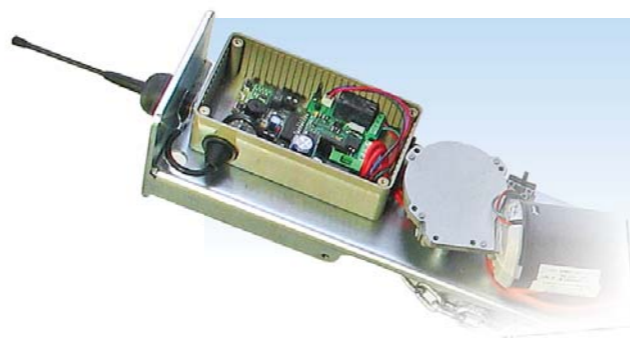

The chain

The chain of the LIFT X is made of nylon which ensures strong stability and durability. The maximum charge of the chain has been developed for cars up to 3.5 tons.

The automatic lifting chain barrier LIFT X

for closing and restriction of entrances. The LIFT X is for private use (parking space or entrance to house) as well as for public places with lower traffic (service entrance or hotel parking spaces). The big advantage of LIFT X is the compact and shapely motor pillar with all components integrated such as controls and motor as well as the possibility to install it right away.

A second motor-driven pillar is not necessary. You will not only save the additional motor pillar and the linked costs for it but also the wiring works on both sides of the pillar.

Control incl. receiver

The LIFT X can be operated by remote control. With one single push on the transmitter the chain is lowered and the entrance opened. With another impulse the chain of Lift X is lifted and the entrance is closed again.

Fast crossing & easy handling with tousek impulse transmitters

The LIFT X protects private and company property from unauthorised parking and also enables with the easy handling of impulse transmitters a fast and trouble-free lowering and lifting of the chain. The LIFT X guarantees a safe and most importantly an unoccupied parking space for the user.

The emergency release is for manual release of chain in case of power failure.

Description	LIFT X2 / LIFT X2 Solar
Motor	12 V
Max. power	60 W
Max. force	150 N
Duty cycle	20 cycles/day
Max. closing width	10 m
Temperature	min. -25C° up to max. +55C°
Protection class	IP 54
Supply voltage	230 V
pillar dimensions	120x120x1000mm

For detailed information please read the technical sheet. Subject to alteration.

Attention notice: Please note that the safety devices shown in this brochure are only examples and therefore not guidelines for valid norms. The valid norms for the corresponding country have to be followed when installing or when placing into operation.

Eduard Tousek

For many years now,

we have been working on developing gate operators and their accessories at the forefront in the international field. Expertly trained employees and comprehensive service are two of the factors in satisfying customers' wishes.

tousek - the original

The Original **tousek** Quality certificate is your absolute guarantee of the highest quality when you purchase a **tousek** operator.

Reliable and secure

Tousek's leading technical development, including the Rolling Code Radio System, for instance, which generates a new radio code every time the remote control is activated, thus preventing the radio signal from being scanned by unauthorised persons, is your guarantee of greater security, in demand today as part of seamlessly protecting property. The quality of **tousek** products is guaranteed by the most stringent tolerances in manufacture and constant monitoring.

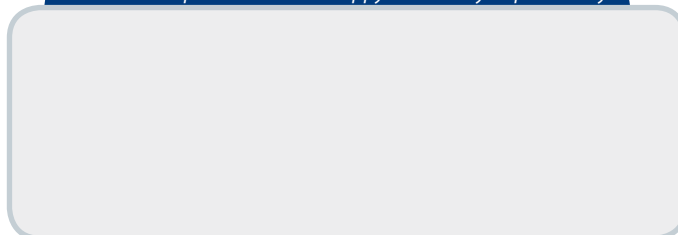

Compatibility

Tousek places great emphasis on keeping all elements of the gate operator, accessory and security programmes compatible as the assortment of products grows.
