MADE IN AUSTRIA

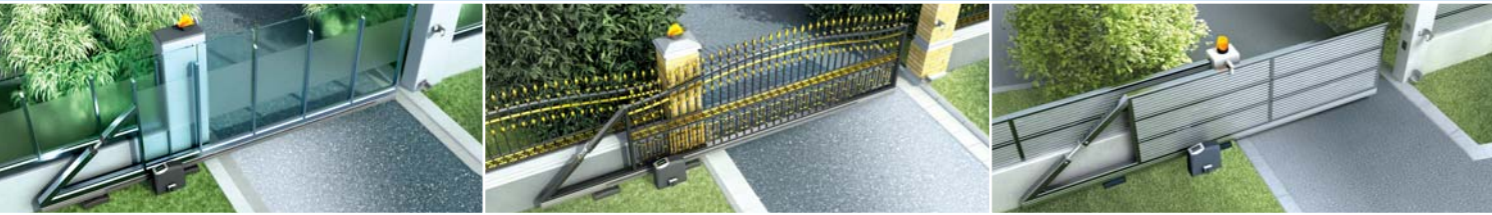

tousek Rollco® LWS 101, 111, 125

Rails of galvanised steel for all cantilevered sliding gates

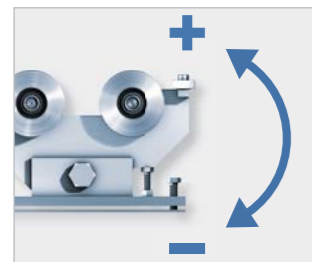

HOT-DIP GALVANISED

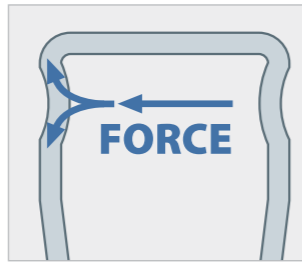

- time-saving installation ■ maximum quiet when running
- optimal resistance to corrosion ■ high carrying power

with a passage width of up to seven metres

adjustable inclination of rolling gear
important against tilting when changing the load and therefore silent and low-wear movement.

concave side wall
much higher stiffness in comparison to usual "flat" walls.

drilling channel
helps gear rack mounting and saves valuable installation time!

unique rolling gear covers
protects and leaves the mechanical parts covered

Quiet
In combination with the solid roller unit and the large, ball-bearing supported steel rollers, the steel rails guarantee maximum quiet when running.

Compatible

The tousek Rollco® LWS 101, 111, 125 cantilever systems for sliding gates have been optimally designed to be compatible with the tousek Pull sliding gate series. Naturally, both systems can also be operated manually.

With the Rollco® LWS 101, 111, 125 cantilever system, tousek has realised a new concept. The rail, of high-quality, hot-dip galvanised steel is suitable for use outdoors without any further surface treatment.

Modern cantilevered sliding-gate constructions are advantageous in many ways. The most important one: imperviousness to ice and snow, the gate hovers away from all ground unevenness.

The solid roller unit, with its large, ball-bearing supported steel rollers, ensures optimal guidance and guarantees the greatest quiet in operation, even at maximum load, and reliability for many, many years.

The adjuster screw prevents the tilt-effect during endurance reactions. The maintenance-free ball bearings, impervious to dust, are another characteristic of highest tousek quality.

Steel guide bracket, galvanised

Stainless steel turnbuckle

Steel limit plate with rubber bumper, galvanised

Steel guide-in fork bracket, galvanised

Steel guide-in bracket, galvanised

mounting consoles

Steel limit plate with support roller, galvanised

Steel mounting plate, height-adjustable, for sliding-gate motor

plastic covering

Gear rack for automatic gates (plastic or steel)

Roller units LWS

Solid construction, galvanised, with stainless steel sub-plating, ball-bearing supported steel rollers for quiet running

	max. length	max. carrying power	max. weight	max. gate freq.	max. passage width						a	b	c	d	
					3m	4m	5m	6m	7m	8m	9,1m				
LWS101	6m	25kg	150kg	20								75	69	3	30
LWS111	8m	60kg	390kg	30								84	94	4	30
LWS125	12m	150kg	1130kg	200								105	125	5	30

See the technical specification sheets for further details. We reserve the right to alter measurements.

Note: Please be aware that the gate-security devices shown in this brochure are examples and are not to be considered as guidelines with regard to applicable standards. The standards in effect in each country must be complied without fail during start-up and/or installation.

Eduard Tousek

For many years now,

we have been working on developing gate operators and their accessories at the forefront in the international field. Expertly trained employees and comprehensive service are two of the factors in satisfying customers' wishes.

tousek - the original

The **Original tousek Quality** certificate is your absolute guarantee of the highest quality when you purchase a **tousek** operator.

Reliable and secure

Tousek's leading technical development, including the Rolling Code Radio System, for instance, which generates a new radio code every time the remote control is activated, thus preventing the radio signal from being scanned by unauthorised persons, is your guarantee of greater security, in demand today as part of seamlessly protecting property. The quality of **tousek** products is guaranteed by the most stringent tolerances in manufacture and constant monitoring.

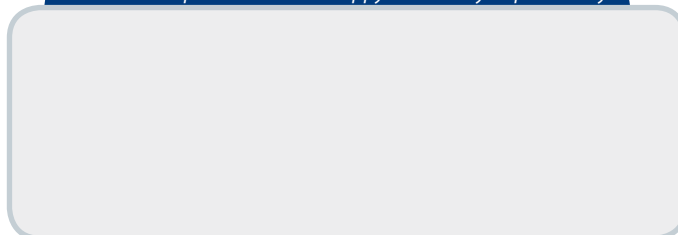

Compatibility

Tousek places great emphasis on keeping all elements of the gate operator, accessory and security programmes compatible as the assortment of products grows.
